There is nowhere quite as extraordinary as Madagascar!

The unique forests, friendly villages and lively cities will be remembered long after your trip has ended. Sadly, alongside the beauty, you cannot fail to notice the extreme poverty that is leaving so many Malagasy people with little access to nutrition, clean water, healthcare or education. This poverty is putting enormous pressure on Madagascar's unique habitats, resulting in mass deforestation and the risk of extinction for thousands of species found nowhere else on earth.

The people and ecosystems of Madagascar are teetering on the brink of survival, but there is always hope. Over the past 30 years, Money for Madagascar (MfM) has helped thousands of people achieve a better quality of life whilst protecting their environment.

Make a donation

Our work depends on the support of individuals like you. Your donation will really make a difference to some of the most vulnerable people on earth. Please give them the chance to build a better future for themselves and ensure that Madagascar's unique environment is preserved for generations to come.

Please donate at
www.moneyformadagascar.org
or complete the donation form overleaf.

Will you give something back to this precious island with its stunning landscapes, welcoming people and unique wildlife?

How you can help

Offset your flight

One person's return flight from Europe to Madagascar is responsible for emitting 3.3 tonnes of CO2 into the atmosphere*. Planting trees is a simple and effective way to neutralise these emissions, protect vulnerable habitats and improve livelihoods.

£40 will pay for the planting and aftercare of 80 trees; offsetting your individual return flight.

Visit a project

All MfM projects are run by dedicated Malagasy staff who would be delighted to show you their work. You can arrange a visit through your tour operator or by contacting us directly:

- Whilst in the capital, take the opportunity to visit one of the programmes we support for street kids, young mothers and orphans. Witness first-hand the transformative value of providing education, food and healthcare to vulnerable young people. If you are able to take along basic medication, first aid supplies, stationery, clothes or left over Malagasy currency, these will be gratefully received.

- Visit one of our 'Education for Life' schools in Itasy, Antsirabe and Toamasina and see the enthusiasm of children, hungry to learn, who are relishing the chance to enjoy a decent education.

- Do you want to help restore Madagascar's rainforest? Now's your chance! MfM supports the pioneering work of Mitsinjo to plant wildlife corridors around the Andasibe national park. The local community are literally replanting the rainforest. Take the chance to plant your own tree!

Congratulations MfM on all you have done to help protect Madagascar's marvellous forests and the many species that live there. Madagascar is the home of a multitude of marvellous creatures that live only there. They urgently need all the help and protection we can give them.
